

Key progress indicators

Highlights

- The Shelter/NFI sector through the Whole of Syria secretariat analyzed the NFI distributions activities conducted by the four Whole of Syria hubs (Damascus, Turkey, Jordan and Iraq) during the first quarter of 2016. During this period 687 communities have been reached by all hubs and eleven of these communities have been reached by more than one hub. The correspondent potential overlap rate is 1,6%. While the sector is looking for minimizing the overlap rate it is also monitoring areas that have never been reached.
- The continuous shifting of front-lines is not allowing safe access to humanitarian assistance deliveries. Between April and May the Shelter/NFI Cluster has assisted to a 62% decrease in the monthly reach mainly in reason of access related issues. Consequently the reach of the HTR and besieged communities/towns (OCHA list) has decreased of the 17% too.
- An ad hoc meeting on Aleppo city has been chaired in order to understand the view of partners active in the eastern part of the city on the potential enclavement. The capacity of the cluster has been assessed on the basis of the possible scenarios. A plan has been finalized and shared with the main stakeholders.

Cluster Priorities

- Respond to the ongoing displacements especially within the host communities in coordination with Damascus and Jordan hubs
- Increase the access to shelter and the standards of the shelter stocks
- Promote a sector oriented assessment
- Advocate for the centralization of the stocks

Challenges/Gaps

- The update of the People in Need figures at sub-district level is crucial in order to determine accurate gaps. The data available is from September 2015 (WOS assessment).
- Constraints in stockpiling big amounts inside Syria due to access, condition of the roads, security, size of the trucks.
- Continued assistance to besieged areas.
